

BAC's Environmental Policy

At BAC we are committed to conducting our activities in such a manner as to protect, maintain and enhance our environment. We do this through establishing and maintaining policies and practices that will support a more sustainable future. We comply with relevant government standards, laws and guidelines established to safeguard our environment. Additionally, where feasible, we will use materials, supplies and energy in a manner that will minimize the impact on the environment. This may include, for example, using "green" cleaning solutions, recycling waste materials, using recycled items and so on.
